EasyEase EdTech

Lead Product Designer

EasyEase is a learning platform that combines storytelling, visualization, interaction, and gamification to teach STEM subjects. It focuses on making science subjects like Mathematics, Physics, Chemistry, and Biology more relatable and engaging for high school students.

Core Challenge

The bedrock of Science, Technology and Engineering (STE) is Mathematics, Physics and Chemistry. These subjects are abstract in nature. Students find them difficult to study in high school. Good teachers are hard to find. Bad teachers make the problem worse for students.

The Power Of
Storytelling

Timeline

4 Months (Discovery to High-Fidelity Prototype)

Tools

Figma, Miro, Notion
Design thinking, Ideation

EasyEase

Research & Market Discovery

The research on the African e-learning market highlights significant growth and competitive dynamics:

Competitive Landscape

Key Players In Africa

- 1. Via Afrika
- 2. Obami
- 3. Dapt.io
- 4. Eneza Education
- 5. Tutor.ng

Key Players In Nigeria

- 1. Ulesson
- 2. Roducate
- 3. StudyLab 360
- 4. PrepClass
- 5. AfriLearn

Market Size

Africa e-learning market reached

Key Market Segmentation

By Product Type

- 1. Packaged Content
- 2. Services
- 3. Platforms

By Technology

- 1. Mobile Learning
- 2. Simulation Based Learning
- 3. Game Based Learning
- 4. Learning Management System (LMS)
- 5. Other

By Sector

- 1. K-12 Sector
- 2. Post-Secondary
- 3. Corporate And Government Learning
- 4. Other

By Country

- 1. South Africa
- 2. Morocco
- 3. Nigeria
- 4. Tunisia
- 5. Kenya
- 6. Others

On a regional-basis, South Africa, Morocco, Nigeria, Tunisia, and Kenya emerge as countries where e-learning is gaining prominence rapidly. South Africa represents the largest region, accounting for nearly **one-fourth of the African market**

EasyEase

User Persona

Understanding our core learner demographics and expectations.

Target Learner

Junior Secondary Student

Ages 11 to 14 | Grades 7-9

"I want to understand science and maths, but reading long chapters from old textbooks makes me feel bored and confused."

Key Pain Points

- Abstract STE subjects are extremely difficult to grasp
- Lack of engaging, modern storytellers & teachers
- Conventional science learning is rarely interactive or fun

100%

STE Subject Focus

Dedicated visually to Maths, Physics, and Chemistry

AR + 3D

Visual Experience

Bringing complex abstract concepts to life natively

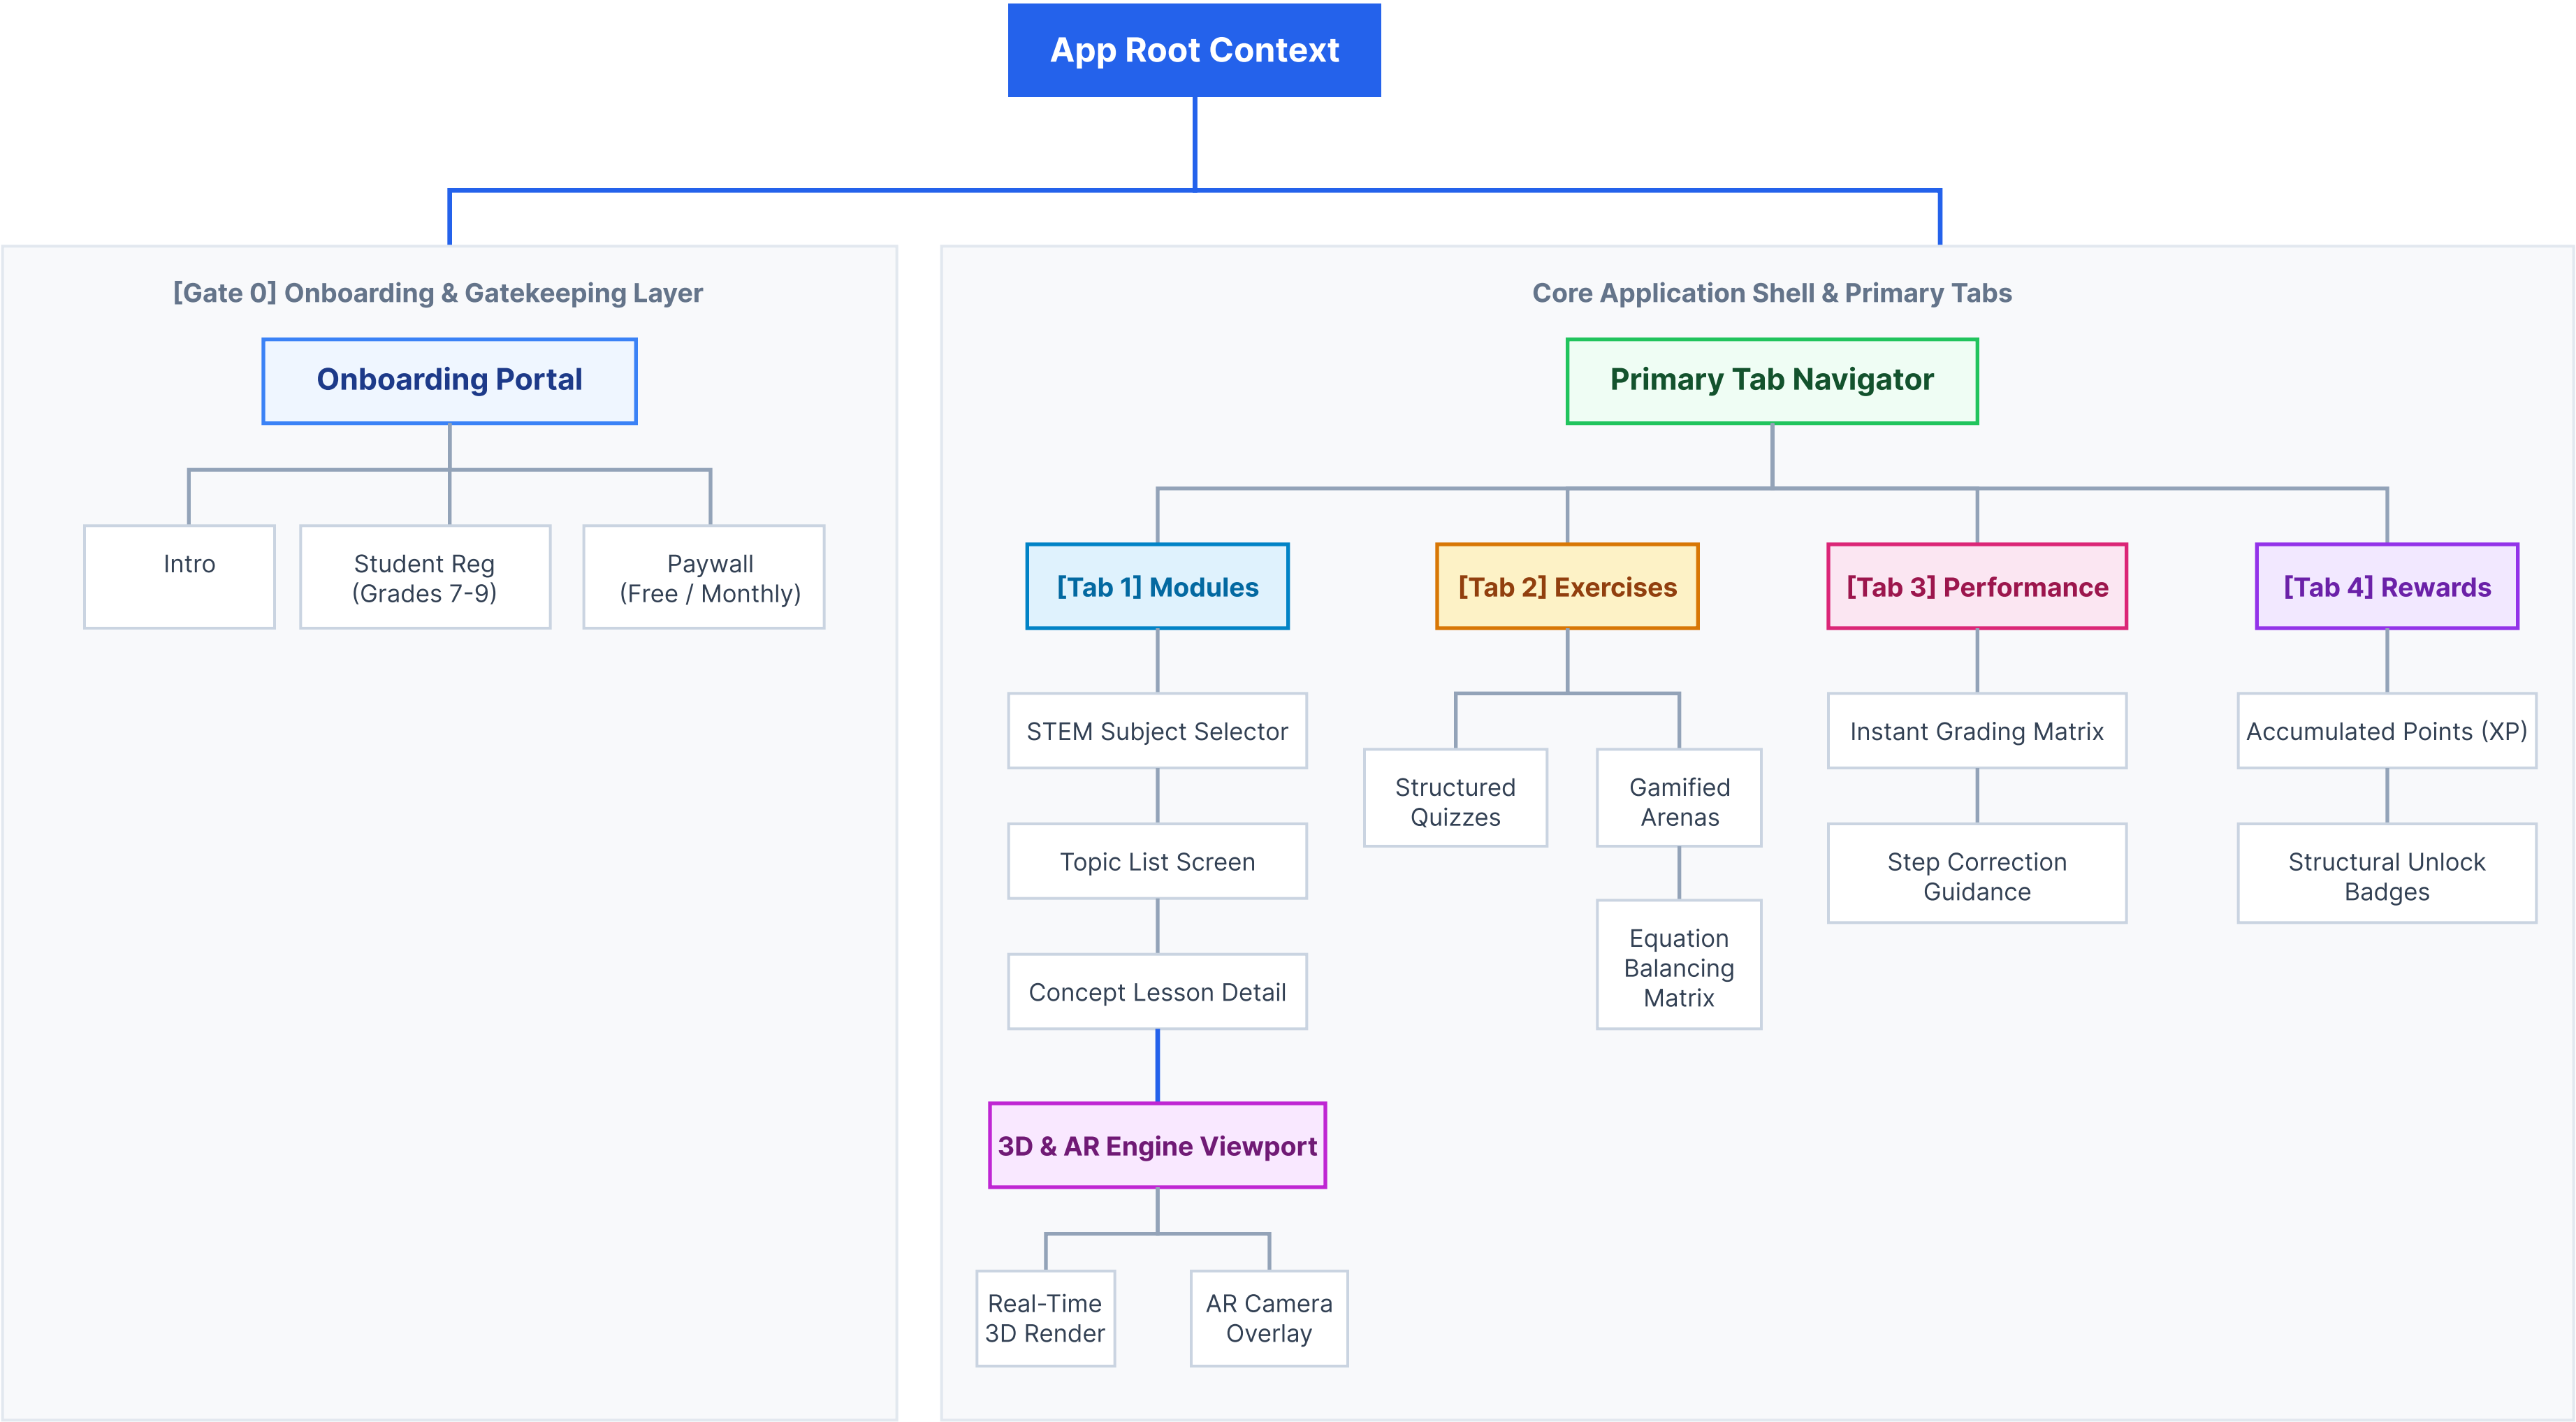

Interactive

Gamification Style

Rewarding visual progress that keeps young minds engaged
